

# Major Hurricane Matthew Briefing Situation Overview

**...THIS IS NOW A WORST CASE STORM SURGE SCENARIO...**

- ☞ Catastrophic Damage is Anticipated for Coastal Areas.
- ☞ Major Hurricane Matthew is still expected to move DANGEROUSLY CLOSE the Florida First Coast and Southeast Georgia Coast Friday through Friday night into Saturday with *catastrophic impacts* expected along and near the coast.
- ☞ A major hurricane has not impacted this area in 118 years, since October 2<sup>nd</sup> 1898. There is NO local living memory of the potential of this event. *If a direct landfall occurs this will be unlike any hurricane in the modern era.*
- ☞ The western eyewall is expected to move along a portions of the coast with sustained winds 115 to 125 mph and gusts in the most affected areas!
- ☞ *Winds will be higher in high rise structures in Downtown Florida possibly strong Category 4 to Category 5 intensity!*
- ☞ *Some of the lowest barrier islands will be completely overtopped with large battering wave and life threatening flooding. Barrier islands are likely to be breached and it is extremely possible that new inlets will be cut in the worst affected areas.*
- ☞ Please, Please heed the advice of public and emergency management officials. 40 people in New York and New Jersey did not heed these warning during Sandy and died in the storm surge!
- ☞ *This will be a MUCH Greater surge than Sandy had along the New Jersey Shore!*

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

# Five Day Cone of Uncertainty And Area of Potential Impacts

Possible  
Impacts

Possible  
Track

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

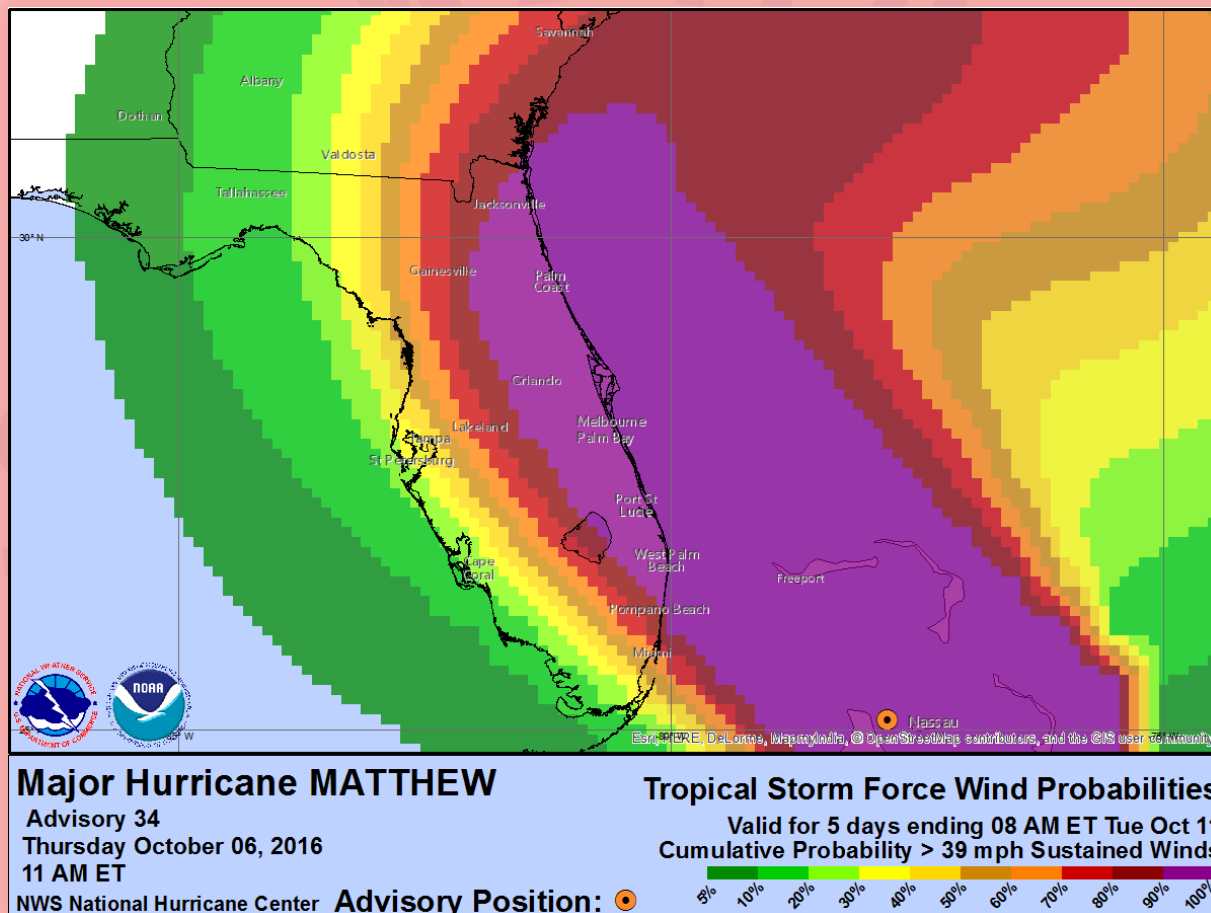

2

# Tropical Storm Force Wind Speed Probabilities

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

The storm poses an imminent threat of tropical storm and/or hurricane conditions to **SOME PORTION** of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

3

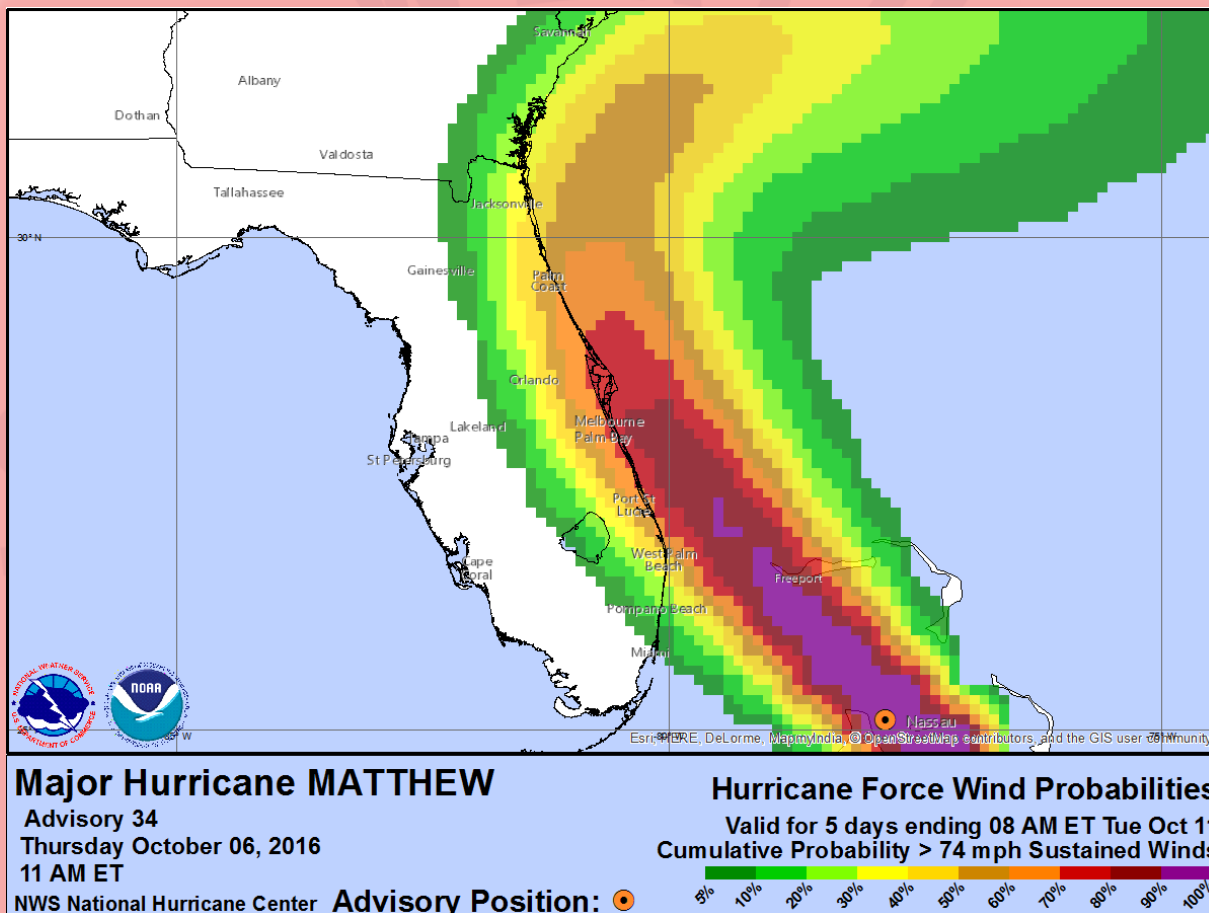

# Hurricane Force Wind Probabilities

These value are increasing, they are indicating  
a chance of a high impact event.

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

The storm poses an imminent threat of tropical storm and/or hurricane conditions to **SOME PORTION** of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

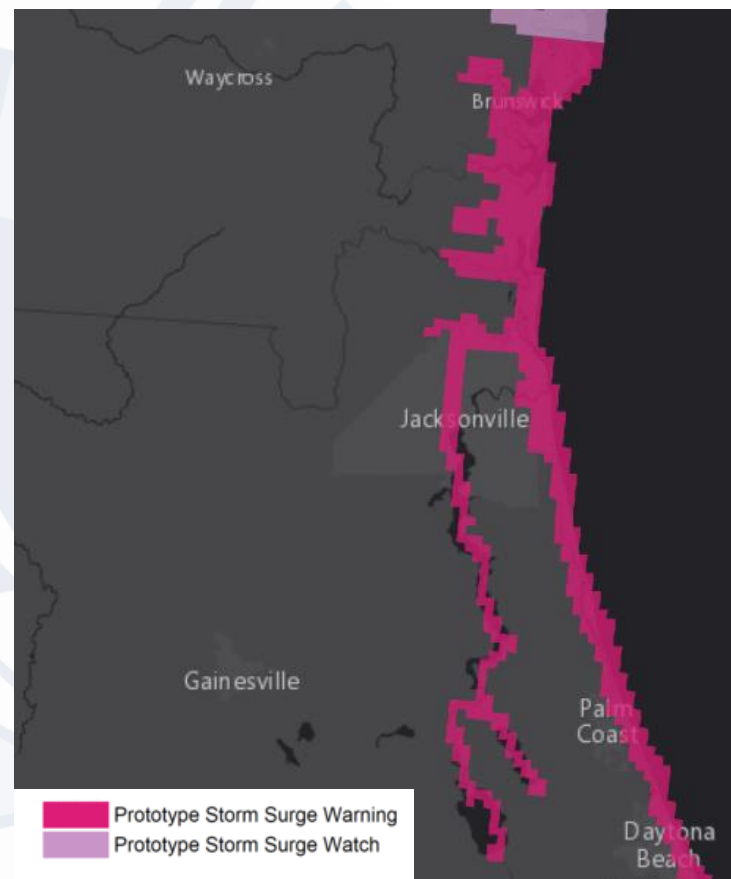

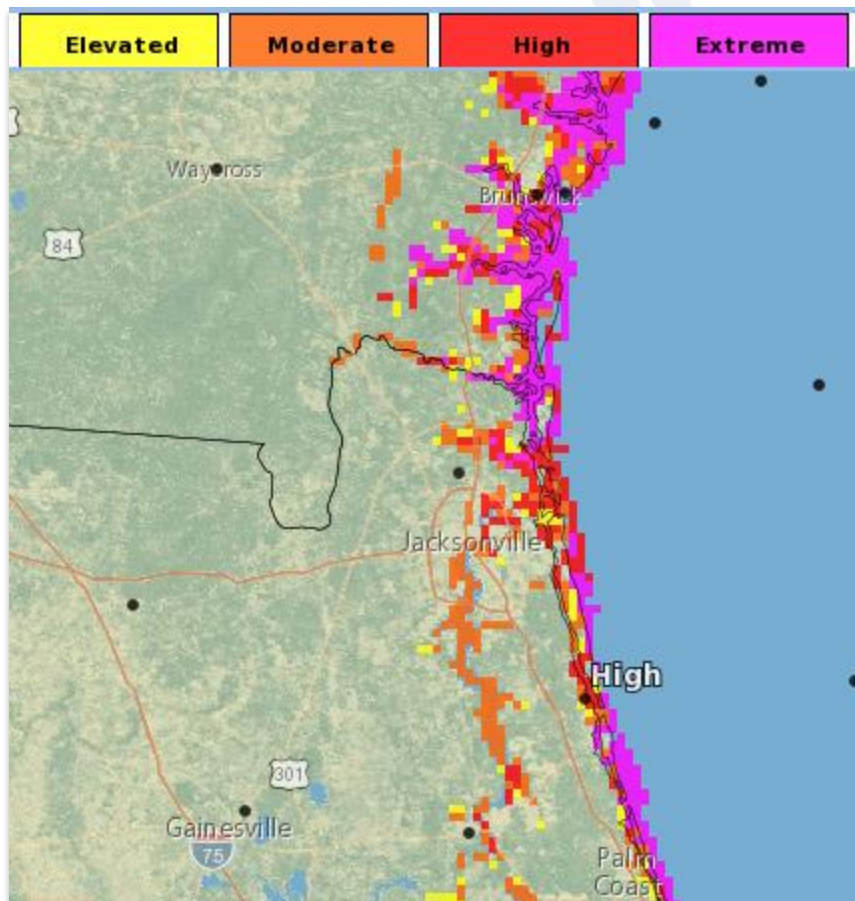

4

# Storm Surge Threat and Warning

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

The storm poses an imminent threat of tropical storm and/or hurricane conditions to **SOME PORTION** of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

5

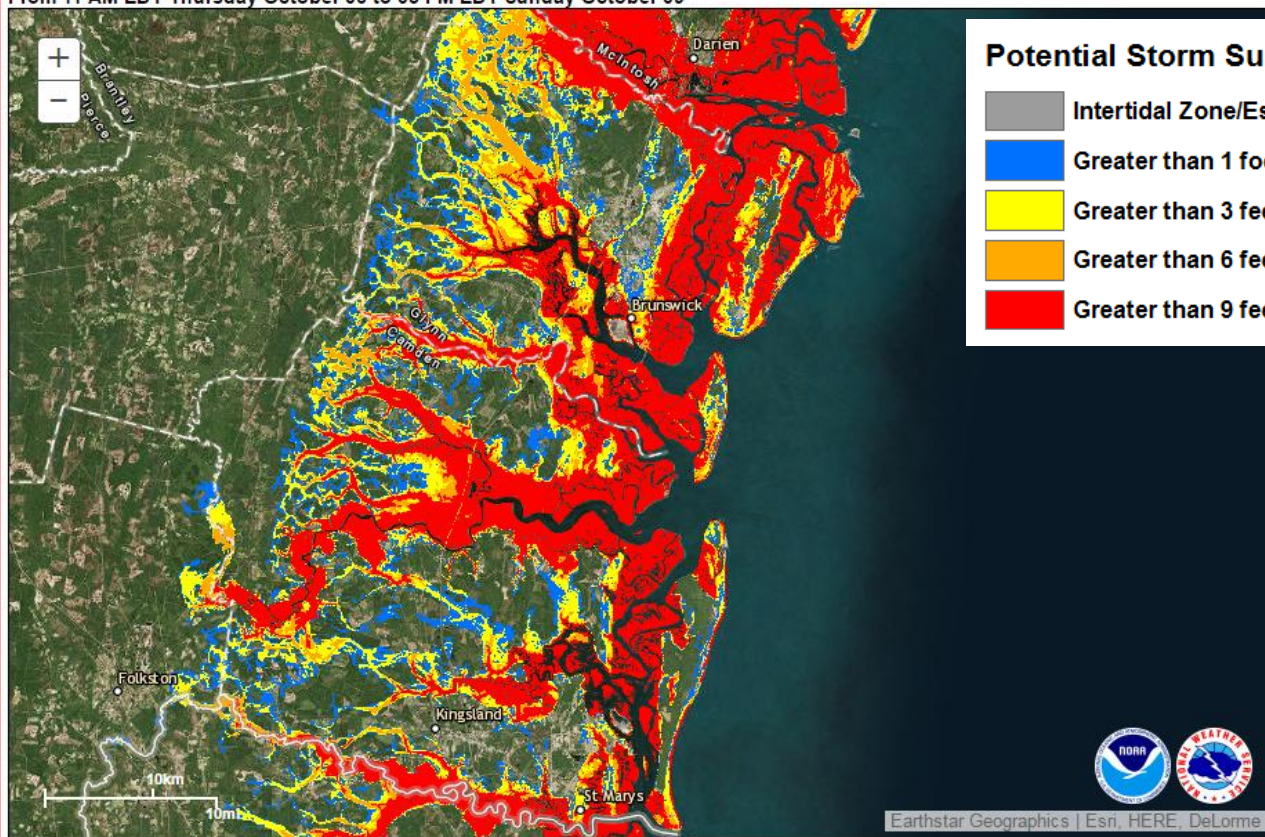

# Reasonable Worst Case Storm Surge

NHC Potential Storm Surge Flooding Map

Hurricane MATTHEW (2016) Advisory 34

From 11 AM EDT Thursday October 06 to 05 PM EDT Sunday October 09

## Potential Storm Surge Flooding\*

- Intertidal Zone/Estuarine Wetland
- Greater than 1 foot above ground
- Greater than 3 feet above ground
- Greater than 6 feet above ground
- Greater than 9 feet above ground

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

6

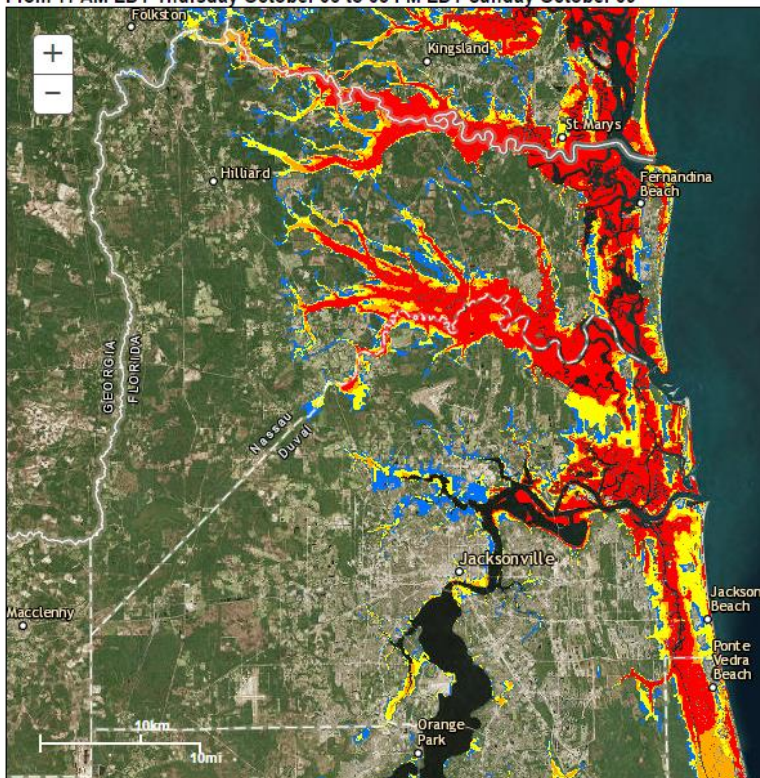

# Reasonable Worst Case Storm Surge

**WARNING!**

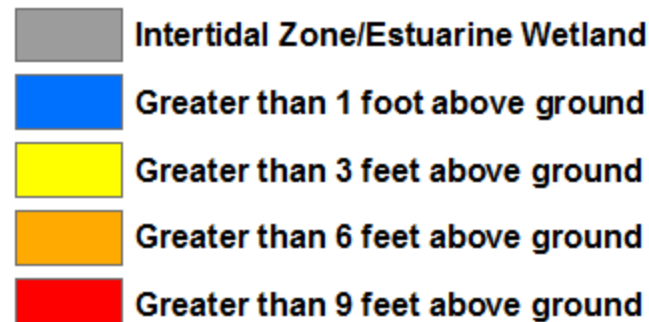

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

Hurricane MATTHEW (2016) Advisory 34  
From 11 AM EDT Thursday October 06 to 05 PM EDT Sunday October 09

## Potential Storm Surge Flooding\*

- Intertidal Zone/Estuarine Wetland
- Greater than 1 foot above ground
- Greater than 3 feet above ground
- Greater than 6 feet above ground
- Greater than 9 feet above ground

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

8

# Reasonable Worst Case Storm Surge

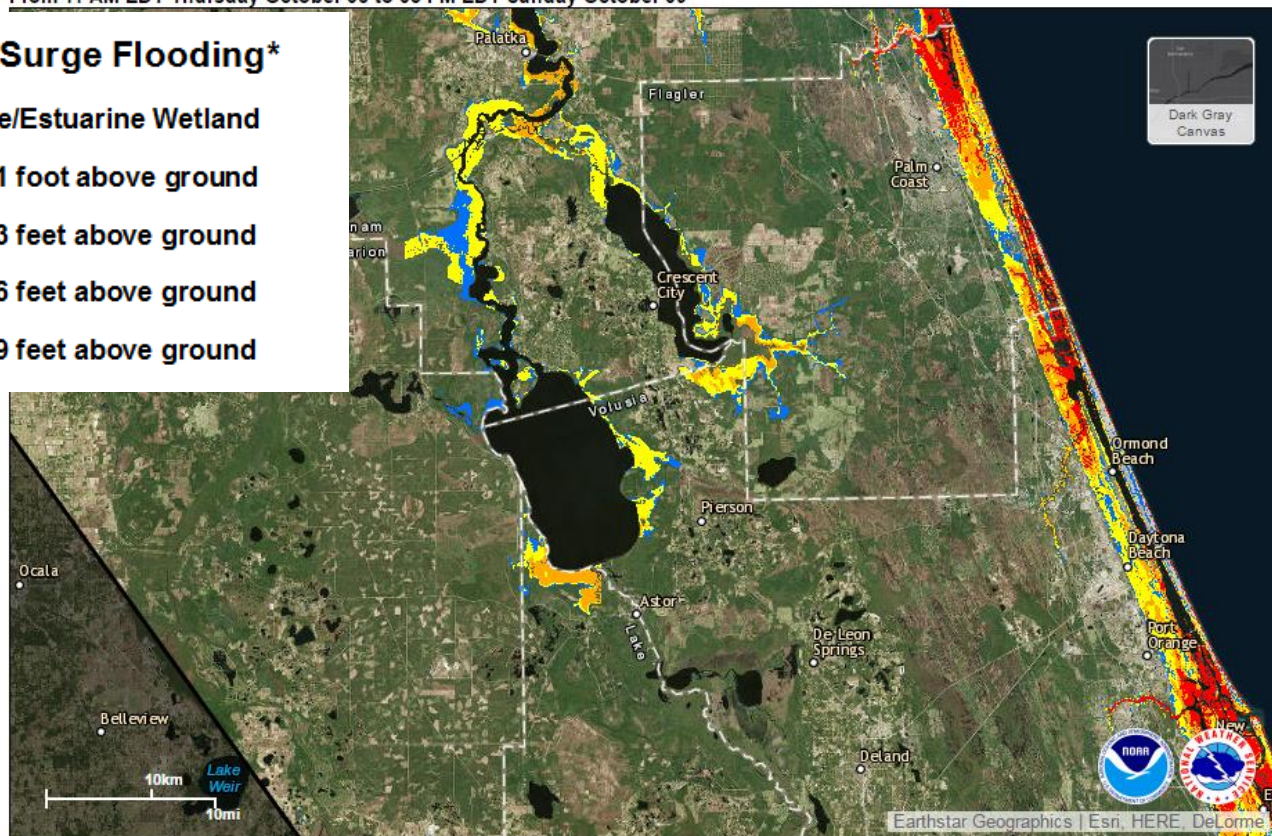

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

NHC Potential Storm Surge Flooding Map  
Hurricane MATTHEW (2016) Advisory 34  
From 11 AM EDT Thursday October 06 to 05 PM EDT Sunday October 09

## Potential Storm Surge Flooding\*

- Intertidal Zone/Estuarine Wetland
- Greater than 1 foot above ground
- Greater than 3 feet above ground
- Greater than 6 feet above ground
- Greater than 9 feet above ground

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

9

# Local Impacts

**Very High Confidence of Destructive Coastal Impacts!!!**

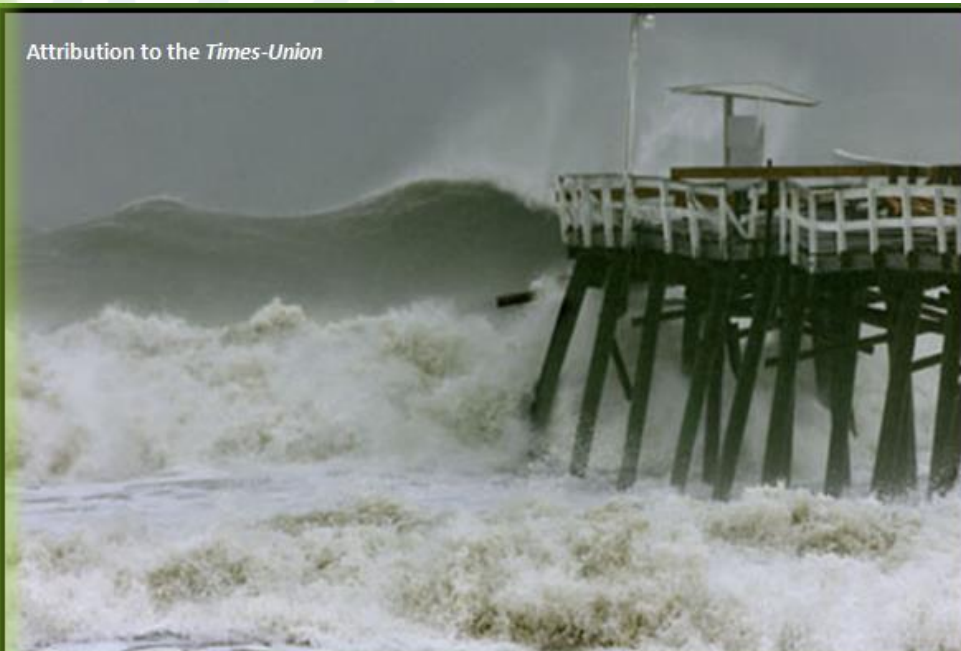

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

## Expected Coastal Impacts:

- Life Threatening Storm Surge greater than 9 feet Above Ground Level expected with large wave action on top of it.
- St Johns River and many other estuaries 6 to 9 Feet.
- Large, Destructive Breakers of 20 to 25 feet.
- Total Devastation of barrier islands.
- New Inlets will likely be cut in weak points on the barrier Islands and peninsulas.
- Complete undermining and scouring of coastal roads.
- Extensive structural collapse along the immediate coast.

Attribution to the *Times-Union*

A robust breaker produced by Hurricane Floyd during September 1999 approaches the Jacksonville Beach Pier. The end of the pier was smashed away.

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

10

# Storm Surge

## Things To Think About...

- Remember Storm Surge graphics depict *STILL water heights*, as though you were in your swimming pool (think neck deep in the pool).
- Unlike your pool a hurricane has large wave action on top of the surge and when those waves impact the beaches and dunes that water “runs up” or put another way it moves inland a considerable distance.
- So we are looking at water 6 to 9 feet deep with large waves on it!
- Imagine 6-foot person, water up to top of head, hit by 20 foot breakers!

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

11

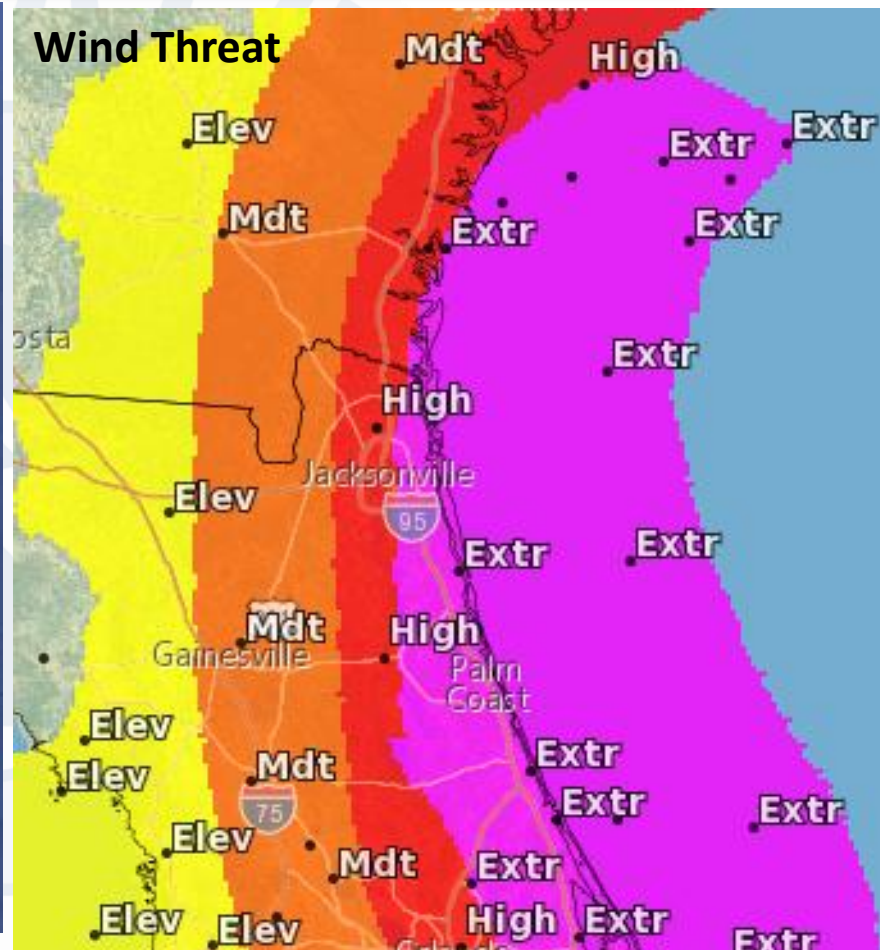

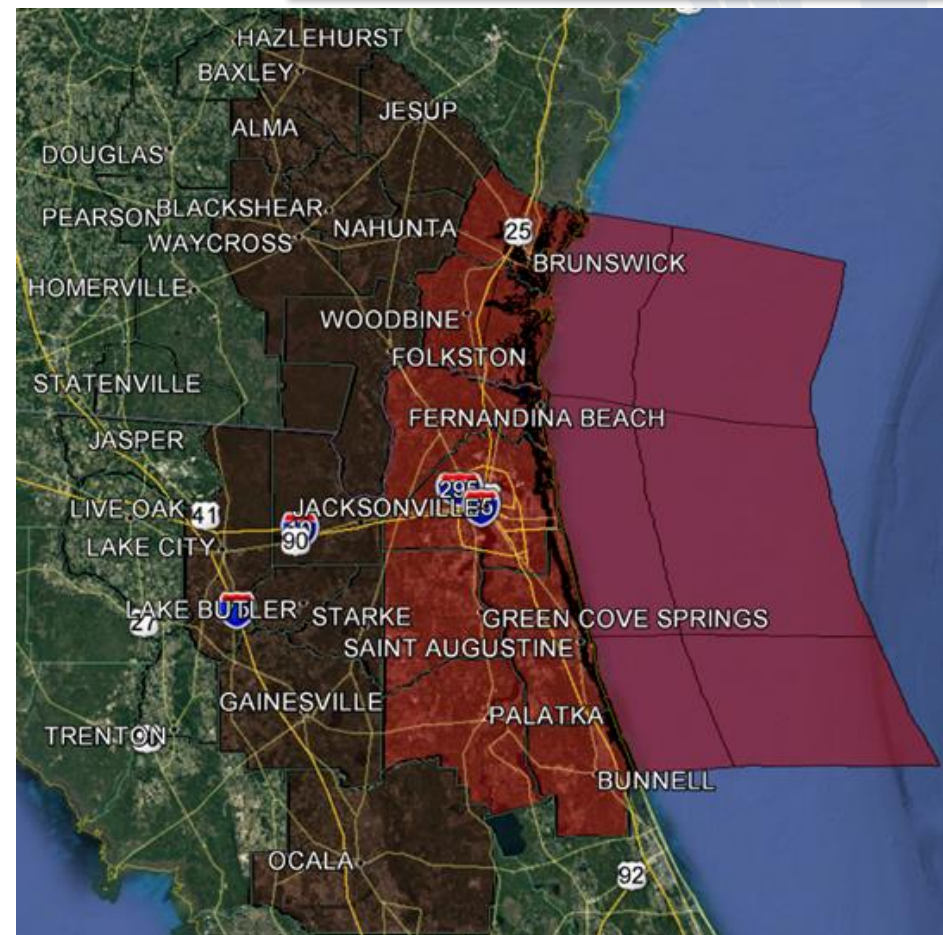

# Hurricane and Tropical Storm Warnings

## Wind Threat

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

 Hurricane Warning

 Tropical Storm Warning

12

# Flagler Beach Possibly in the Eye

## Friday Afternoon 110-125 mph Winds with Gusts 140 mph

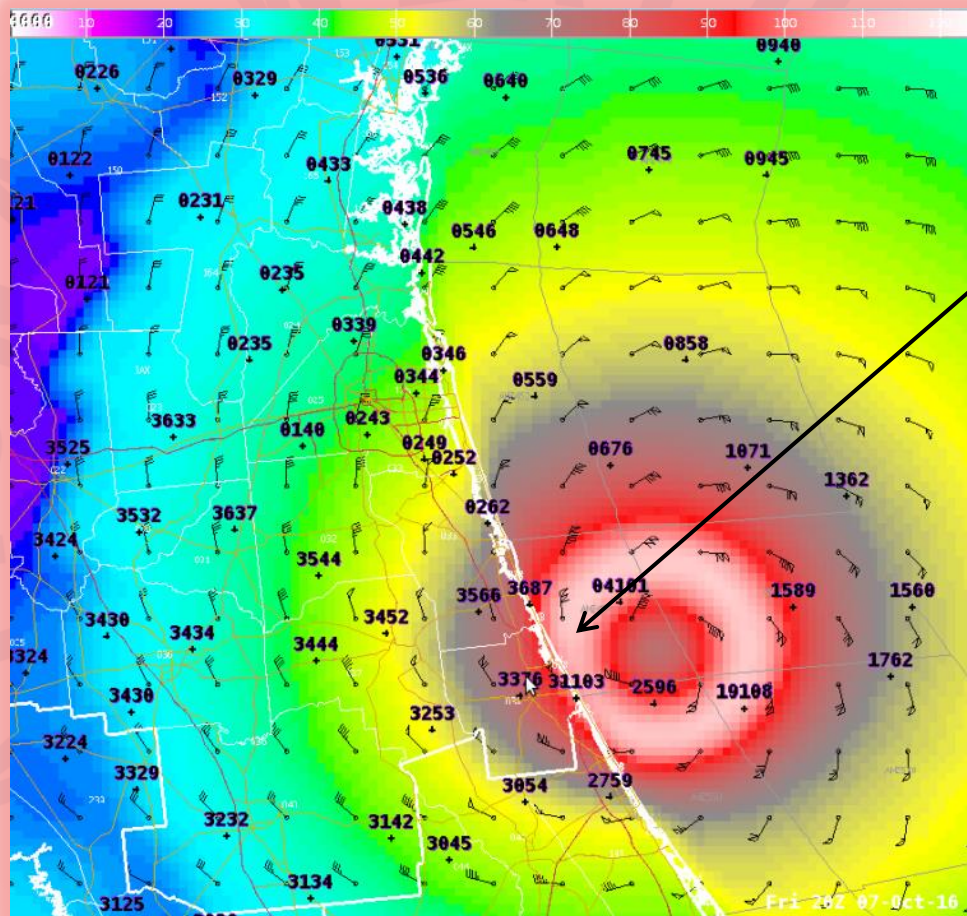

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

13

# Friday 3 p.m. Winds (in Knots)

## 10 knots = 12 mph

**110-125 Mph  
Gusts to 140 mph**

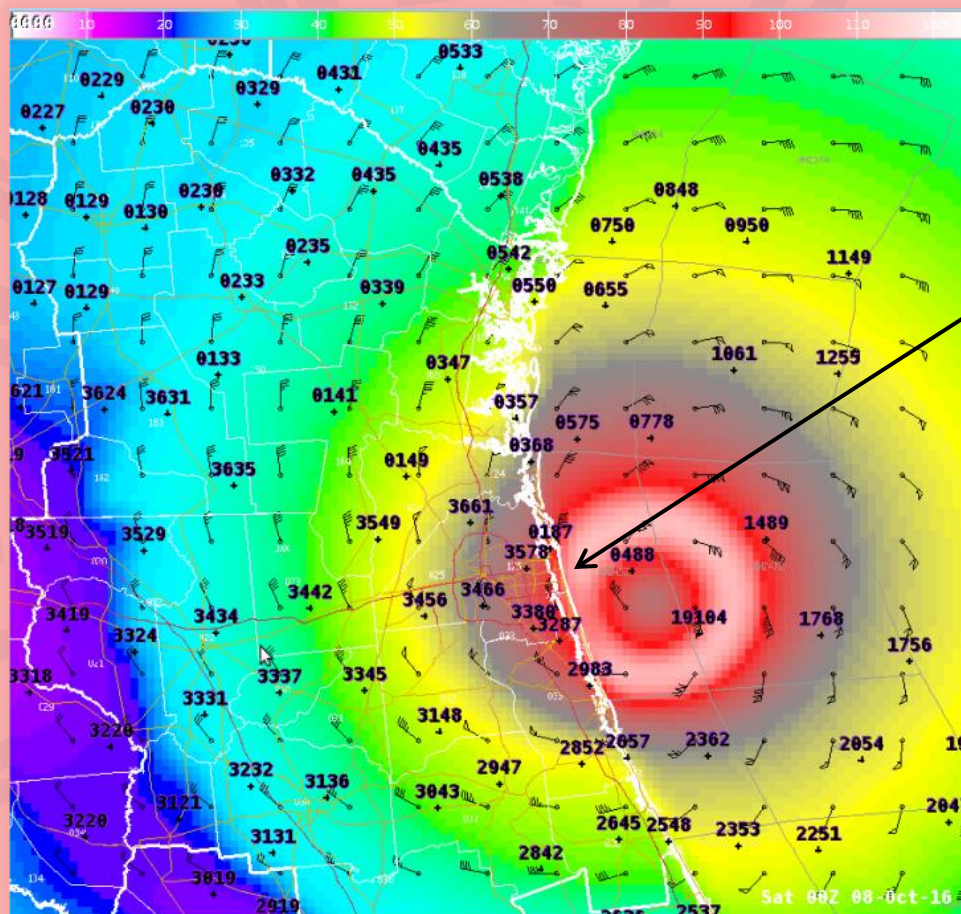

The storm poses an imminent threat of tropical storm and/or hurricane conditions to **SOME PORTION** of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

14

# Friday 9 p.m. Winds (in Knots)

## 10 knots = 12 mph

**80-100 Mph  
Gusts 125 mph**

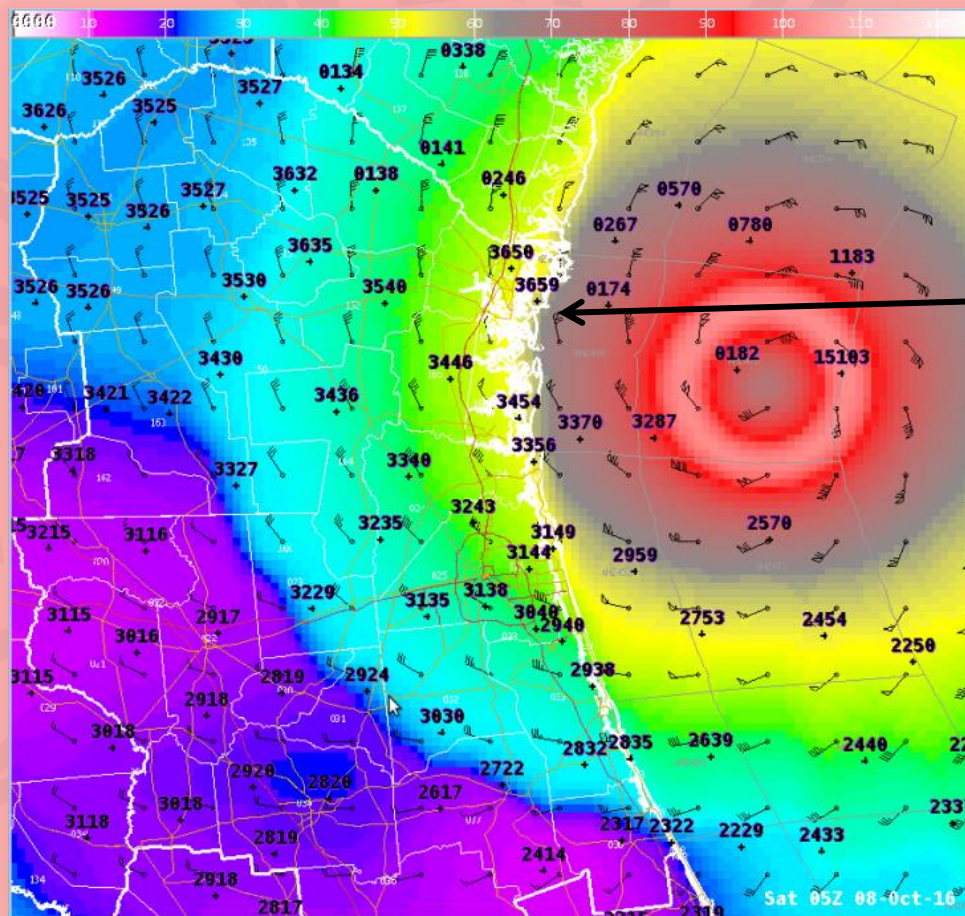

The storm poses an imminent threat of tropical storm and/or hurricane conditions to **SOME PORTION** of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

15

# Saturday 1 a.m. Winds (in Knots)

## 10 knots = 12 mph

65-80 Mph  
Gusts 100 mph

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

16

# High Rise Winds Could Be One Category Higher

- Windows shed glass
- Danger of Falling Debris
- Use caution when sheltering in tall structures.

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

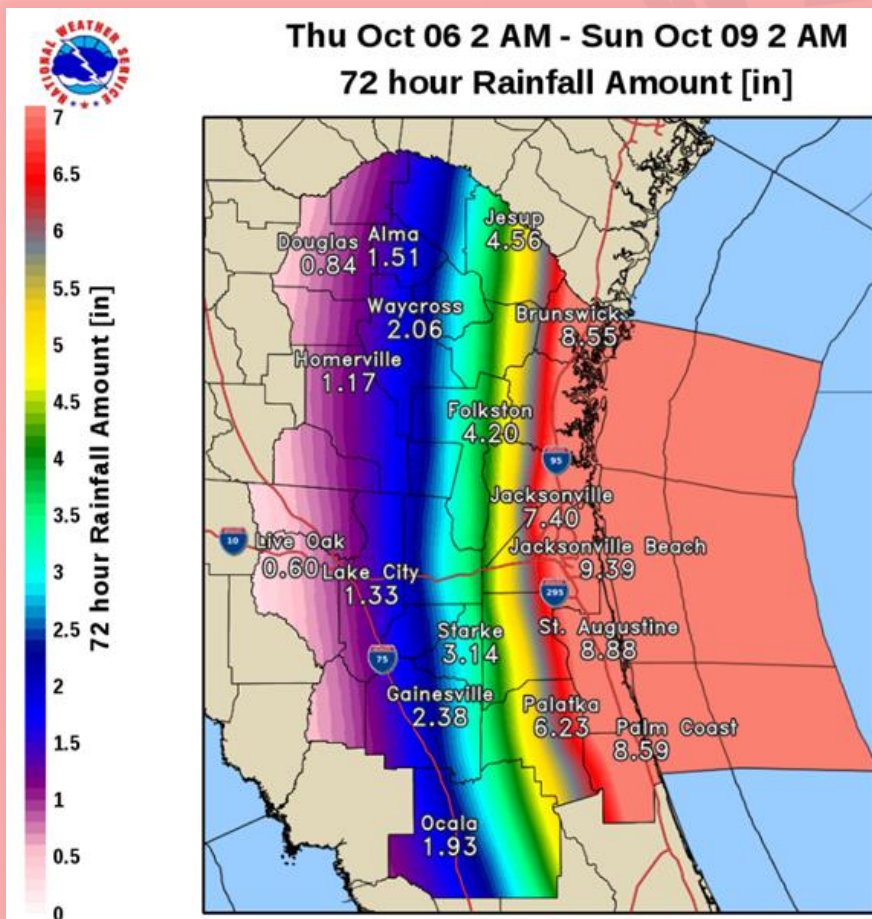

17

# Heavy Coastal Rainfall Likely

**WARNING!**

A Hurricane Warning means hurricane conditions can be expected in some portion of the warned area within the next 36 hours.

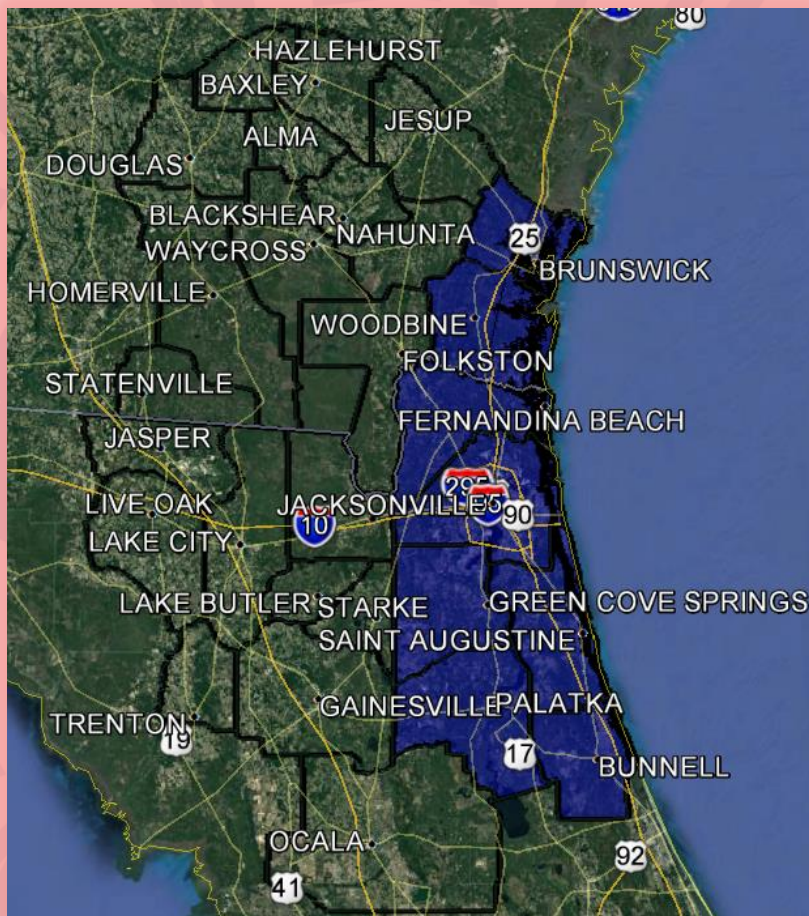

- Localized Pockets of very heavy rain are possible through the duration of the storm event.
- Today through late Friday night, intervals of squally rain bands will come ashore
- Some areas may repeatedly get heavy rainfall, causing localized to large swaths of flooding, particularly over the coastal counties.
- Heavy rainfall combined with storm tide may exasperate standing water in some coastal areas.

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

18

# Flood Watch

The storm poses an imminent threat of tropical storm and/or hurricane conditions to **SOME PORTION** of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.

19

# Making Informed Decisions

- Double check your emergency supply kit and pick up any missing items.
- Fill your vehicle's gas tank.
- Get cash, secure papers and valuables, and refill medication.
- If you plan on evacuating, make arrangements, book reservations, and pack your emergency supply kit and valuables in your car.
- Evacuate immediately if told to do so.

**Hurricane or Tropical Storm  
WATCH is Issued**

- Final Actions if Leaving
  - Turn off propane tanks.
  - Unplug small appliances.
  - Empty the refrigerator and freezer.
  - Turn off utilities, if advised to do so.
  - Lock home securely.
  - Take pets with you.
- Final Actions if Staying
  - Close storm shutters, board up remaining doors and windows, and brace garage doors. Do not use tap on windows!
  - Lower water level in pools by one foot.
  - Turn refrigerator or freezer to coldest setting and open only if necessary.
  - Be prepared to turn off utilities
  - Identify a safe room with no windows.

**Hurricane or Tropical Storm  
WARNING is Issued**

For a comprehensive emergency supply kit list visit [www.ready.gov/kit](http://www.ready.gov/kit).

# Major Hurricane Matthew Talking Points

- On the current official forecast track, the closest approach of MAJOR Hurricane Matthew to the local coast would be Friday and Friday night.
- Potential Impacts:
  - *Major Hurricane Impacts are expected along some portion of the coast!*
  - *Life threatening storm surge with huge, damaging waves on top of it are possible.*
  - *Complete and total destruction of structures on many of the barrier island is likely!*
  - Tropical Storm or greater wind conditions could occur for 24 or more hours!
  - *A shift in the track farther west or east will substantially influence the impacts realized. Stay updated on the latest forecast information!*
  - *HEED the advice of local officials and Emergency Management.*
- Closely monitor the latest forecast from NHC/NWS Jacksonville for updates. The next scheduled briefing is scheduled for 6 p.m. Friday.
- *Please heed coastal evacuation orders!*

The storm poses an imminent threat of tropical storm and/or hurricane conditions to SOME PORTION of the Warning area. Heed the advice of Local officials. Be careful about rumors, erroneous social media posts and unwarranted speculation.
